

Chapter 7
Economic Botany

1. The by-product of distillation of pine leaves are
 - (A) Charcoal
 - (B) lampblack
 - (C) oil
 - (D) fuel gases

2. Which of the following are timber yielding plants?
 - (A) *Quercus*
 - (B) *Cedrus deodara*
 - (C) *Tectona grandis*
 - (D) *Shorea robusta*

3. Dried latex of drug is used
 - (A) opium
 - (B) gatta parcha
 - (C) papain
 - (D) balsam

4. The root of which plants are used as drug
 - (A) rauwolfia
 - (B) ipecacuanha
 - (C) turmeric
 - (D) aconite

5. Which of the following are pseudocereals?
 - (A) *Fagopyrum esculentum*
 - (B) *Chenopodium quinoa*
 - (C) *Oryza sativa*
 - (D) *Amaranth*

6. Drug which is prepared from fruits are
 - (A) artemesia
 - (B) fennel
 - (C) coriander
 - (D) colocynth

7. Fibers that found in the inner bark are
 - (A) jute
 - (B) coir
 - (C) hemp
 - (D) ramie

8. Mark the benefits of chlorella.
 - (A) Remove nitrogen from wastewater
 - (B) Used as biodiesel fuel
 - (C) It a complete source of protein
 - (D) It contains less than 3 amino acids

9. These are used to represent as pathological fungi
(A) smut
(B) morels
(C) molds
(D) rust
10. Agar and carrageenan are polymers of
(A) galactose
(B) phosphoric acid
(C) sulfate
(D) starch

Answer

1. (A), (B), (D)
2. (B), (C), (D)
3. (A), (C), (D)
4. (A), (B), (C)
5. (A), (B), (D)
6. (B), (C), (D)
7. (A), (C), (D)
8. (A), (B), (C)
9. (A), (C), (D)
10. (A), (C)
