WILEY

Strength of Materials, 2ed

By Debabrata Nag, Abhijit Chanda

Paperback 9788126534876 **₹2,199.00**

Pages: 800

Description

The subject lays the ground for various Engineering subjects, ranging from Machine Design, Finite-Element Analysis, Theory of Structures, Bio-Mechanics, and Fracture Mechanics. In this book, the topics are broadly divided into two parts: Elementary Strength of Materials and Advanced Strength of Materials, thereby progressing from basic fundamentals to detailed analysis. The first eight chapters deal with basic concepts of strengths of materials such as theories of stress and strain, torsion, deflection and buckling of columns. The remaining chapters deal with the advanced topics such as advanced theories of stress and strain, energy principles, failure theories, theories of curved and continuous beams, unsymmetric or asymmetric bending.

About the Author

Debabrata Nag, Abhijit Chanda

Dr. Debabrata Nag

Table of Contents

Part A Elementary Strength of Materials

· Stress and Strain

· Torsion

· Thin-Walled Pressure Vessels

· Biaxial Stresses

· Shear Force and Bending Moment of Beams

· Stresses in Beams

· Deflection of Beams

· Buckling of Columns

Part B Advanced Strength of Materials

· Analysis of Stress and Strain

· Energy Principles

· Theories of Failure

· Combined Loadings

· Unsymmetric Bending of Beam

· Shear Stresses in Thin-walled beams

· Axisymmetric Problems in Strength of Materials
· Curved Beam Theory
· Leaf Springs
· Beams of Composite Materials
· Statically Indeterminate Beams - Continuous Beams
Model Question Paper 1
Model Question Paper 2
Model Question Paper 3
Model Question Paper 4
Appendix A
A.1 Area Moment of Inertia
A.2 Product Area Moment of Inertia
A.3 Parallel-Axis Theorem
Appendix B
B.1 Deflection and Elastic Equations of Some Common Beams
B.2 Area, Centroid and Area Moment of Inertia for Some Common Sections
Appendix C
C.1 Symbols and Units
C.2 System of Units
C.3 Area under Parabola
Appendix D
D.1 Pure Bending
Appendix E
Bibliography
Index
