WILEY

Wiley's Halliday / Resnick / Walker Physics for JEE (Main & Advanced), Vol I, 4ed, 2027

By Amit Gupta, David Halliday, Robert Resnick, Jearl Walker

Paperback 9789377067779 ₹1,169.00

Pages: 964

Description

A must-have resource for JEE aspirants!

This adapted version of one of the world's most successful books on Physics combines the Halliday, Resnick and Walker's approach to Physics with JEE requirements. The book has been designed to help the students overcome the hurdles while preparing for JEE in terms of concepts and problem solving.

- The book offers a unique combination of authoritative content and stimulating problems.
- Original book presented in two volumes in keeping with recommended JEE syllabus.
- Includes additional topics and sample problems for complete coverage of latest JEE syllabus.
- Includes substantial subjective and objective questions for practice with answer key.
- Includes a comparative trend analysis table of JEE Advanced questions from 2014 to 2020 along the topics that have been in focus.
- Free Complementary Booklet having JEE Advanced / Multidisciplinary PYQs (2021-2025) with Answers (and Solutions on the web).
- Includes JEE Main 2026 Paper.

About the Author

Amit Gupta, David Halliday, Robert Resnick, Jearl Walker

David Halliday is associated with the University of Pittsburgh as Professor Emeritus. As department chair in 1960, he and Robert Resnick collaborated on Physics for Students of Science and Engineering and then on Fundamentals of Physics. This text is currently in its eighth edition and has since been handed over from Halliday and Resnick to Jearl Walker. Dr. Halliday is retired and resides in Seattle.

Robert Resnick is professor emeritus at Rensselaer and the former Edward P. Hamilton Distinguished Professor of Science Education, 1974-93. Together with his co-author David Halliday, he revolutionized physics education with their now famous textbook on general physics, still one of the most highly regarded texts in the field today.

Jearl Walker, professor of physics at Cleveland State University, received his BS in physics from MIT in 1967 and his PhD in physics from University of Maryland in 1973. His book The Flying Circus of Physics was published 30 years ago, has been translated into at least 10 languages, and is still being sold worldwide. For 16 years he toured his Flying Circus talk throughout the U.S. and Canada, introducing such physics stunts as the bed-of-nails demonstration and the walking-on-hot-coals demonstration to countless physics teachers, who then proceeded to hurt themselves when they repeated the stunts in their own classrooms. These talks led to his PBS television show Kinetic Karnival which ran nationally for years and which earned an Emmy.

Amit Gupta is the Head of Department at BANSAL CLASSES, KOTA which is the most prestigious coaching academy for IIT-JEE aspirants. An IITian himself, he has been teaching Physics for over a decade to students preparing for the JEE.

Table of Contents

Preface

Acknowledgments

Note to the Student

Chapter Wise Comparative Analysis of JEE Advanced

(2014–2024) Questions with Focus Topics

1 Units and Measurement

1.1 What is Physics?

1.2 Measuring Things

1.3 The International System of Units

1.4 Fundamental SI Quantities

1.5 Significant Figures and Decimal Places

1.6 Error Analysis

1.7 Length Measuring Instruments

1.8 Dimensional Analysis

Review and Summary

Problems

Practice Questions

Answer Key

2 Motion Along a Straight Line

2.1 What is Physics?

2.2 Motion

2.3 Position and Displacement

2.4 Average Velocity and Average Speed

2.5 Instantaneous Velocity and Speed

2.6 Acceleration

2.7 Constant Acceleration: A Special Case

2.8 Free-Fall Acceleration

2.9 Graphical Integration in Motion Analysis

Review and Summary

Problems

Practice Questions

Answer Key

3 Vectors

3.1 What is Physics?

3.2 Vectors and Scalars

3.3 Vector Addition

3.4 Components of Vectors
3.5 Unit Vectors
3.6 Adding Vectors by Components
3.7 Multiplying Vectors
Review and Summary
Problems
Practice Questions
Answer Key
4 Motion in Two and Three Dimensions
4.1 What is Physics?
4.2 Position and Displacement
4.3 Average Velocity and Instantaneous Velocity
4.4 Average Acceleration and
Instantaneous Acceleration
4.5 Projectile Motion
4.6 Relative Motion in One Dimension
4.7 Relative Motion in Two Dimensions
Review and Summary
Problems
Practice Questions
Answer Key
5 Force and Motion – I
5.1 What is Physics?
5.2 Newtonian Mechanics
5.3 Newton’s First Law
5.4 Force
5.5 Mass
5.6 Newton’s Second Law
5.7 Newton’s Third Law
5.8 Some Particular Forces
5.9 Constraint Motion: Bodies with Linked Motion
5.10 Applying Newton’s Laws
5.11 Motion in Accelerated Frames:
Fictitious/Pseudo Force
Review and Summary
Problems
Practice Questions
Answer Key

6 Force and Motion – II

6.1 What is Physics?

6.2 Friction

6.3 Properties of Friction

6.4 Some More Applications of Properties of Friction

6.5 The Drag Force and Terminal Speed

Review and Summary

Problems

Practice Questions

Answer Key

7 Circular Motion

7.1 What is Physics?

7.2 Angular Variables

7.3 Relation Between Angular Velocity and Linear Velocity

7.4 Particle in Uniform Circular Motion

7.5 Particle in Non-Uniform Circular Motion

7.6 Dynamics of Uniform Circular Motion

7.7 Dynamics of Non-Uniform Circular Motion

7.8 Centrifugal Force

Review and Summary

Problems

Practice Questions

Answer Key

8 Work, Power, and Energy

8.1 What is Physics?

8.2 Kinetic Energy

8.3 Work

8.4 Calculation of Work for Uniform Force

8.5 Work Done by the Gravitational Force

8.6 Work Done by a Spring Force

8.7 Work Done by a General Variable (Nonuniform) Force

8.8 Validity of Work–Kinetic Energy Theorem in Inertial Reference Frames

8.9 Potential Energy

8.10 Work and Potential Energy

8.11 Path Independence of Conservative Forces

8.12 Determining Potential Energy Values

8.13 Work–Mechanical Energy Theorem

8.14 Conservation of Mechanical Energy

8.15 Work Done on a System by an External Force

8.16 Conservation of Energy

8.17 Power

8.18 Relation Between Conservative Force and Potential Energy

8.19 Vertical Circular Motion

Review and Summary

Problems

Practice Questions

Answer Key

9 Center of Mass

9.1 What is Physics?

9.2 The Center of Mass
9.3 Newton’s Second Law for a System of Particles
9.4 Linear Momentum
9.5 The Linear Momentum of a System of Particles
9.6 Impulse and Momentum
9.7 Conservation of Linear Momentum
9.8 Collisions
9.9 Inelastic Collisions in One Dimension
9.10 Elastic Collisions in One Dimension
9.11 Collisions in Two Dimensions
9.12 C-Frame
9.13 Impulse Momentum Equation for Continuous Processes
9.14 Systems with Varying Mass: A Rocket
9.15 Some Derivations Pertaining to com of Objects
Review and Summary
Problems
Practice Questions
Answer Key

10 Rigid Body Dynamics – I
10.1 What is Physics?
10.2 Rotational Variables
10.3 Are Angular Quantities Vectors?
10.4 Rotation with Constant Angular Acceleration
10.5 Relating the Linear and Angular Variables
10.6 Kinetic Energy of Rotation
10.7 Calculating the Rotational Inertia
10.8 Torque
10.9 The Vector Product Revisited
10.10 Vector Product and Torque
10.11 The Center of Gravity
10.12 The Rigid Object Under a Net Torque
10.13 Work and Rotational Kinetic Energy
10.14 Angular Momentum
10.15 Newton’s Second Law in Angular Form

10.16 The Angular Momentum of a System of Particles
10.17 The Angular Momentum of a Rigid Body Rotating about a Fixed Axis
10.18 Conservation of Angular Momentum
Review and Summary
Problems
Practice Questions
Answer Key

11 Rigid Body Dynamics – II
11.1 What is Physics?
11.2 Kinematics of Combined Rotation and Translation
11.3 The Kinetic Energy of Combined Translation and Rotation (Rolling)
11.4 The Forces of Rolling
11.5 Torque About Center of Mass
11.6 Angular Momentum of Rigid Body About a Point Lying Outside the Body
11.7 The Yo-Yo
11.8 Problem Solving on Rolling
11.9 Rigid Body in Equilibrium
11.10 The Requirements of Equilibrium
11.11 Some Examples of Static Equilibrium
11.12 Toppling
11.13 Instantaneous Center of Zero Velocity
Review and Summary
Problems
Practice Questions
Answer Key

12 Elasticity
12.1 What is Physics?
12.2 Elasticity
12.3 Stress and Strain
12.4 Elastic Potential Energy
12.5 Poisson’s Ratio
12.6 Mechanical Properties of Materials
Review and Summary
Problems
Practice Questions
Answer Key

13 Gravitation
13.1 What is Physics?
13.2 Newton’s Law of Gravitation
13.3 Gravitation and the Principle of Superposition
13.4 Gravitation Near Earth’s Surface
13.5 Gravitation Inside Earth
13.6 Gravitational Potential Energy
13.7 Planets and Satellites: Kepler’s Laws
13.8 Satellites: Orbits and Energy
13.9 Einstein and Gravitation
Review and Summary
Problems

Practice Questions
Answer Key

14 Fluids
14.1 What is Physics?
14.2 Density and Pressure
14.3 Fluids at Rest
14.4 Measuring Pressure
14.5 Pascal’s Principle
14.6 Archimedes’ Principle
14.7 Hydrostatic Force on a Curved Surface
14.8 Linear Accelerated Motion of a Fluid
14.9 Motion of a Fluid in a Rotating Vessel
14.10 Buoyant Force
14.11 Fluid Dynamics
14.12 Bernoulli’s Equation
Review and Summary
Problems
Practice Questions
Answer Key

15 Oscillations
15.1 What is Physics?
15.2 Simple Harmonic Motion
15.3 Force Law for Simple Harmonic Motion
15.4 Simple Harmonic Motion and Uniform Circular Motion
15.5 Energy in Simple Harmonic Motion
15.6 An Angular Simple Harmonic Oscillator
15.7 Pendulums
15.8 Damped Simple Harmonic Motion
15.9 Forced Oscillations and Resonance
Review and Summary
Problems
Practice Questions
Answer Key

16 Waves – I
16.1 What is Physics?
16.2 Types of Waves
16.3 Wave Characteristics
16.4 Wave Speed on a Stretched String
16.5 Energy and Power of a Wave Traveling Along a String
16.6 General Differential Equation of a Wave
16.7 Principle of Superposition for Waves
16.8 Interference of Waves
16.9 Phasors
16.10 Standing Waves
16.11 Standing Waves and Resonance
16.12 Propagation of Wave in
Two Connected Strings
Review and Summary

Problems
Practice Questions
Answer Key

17 Waves – II
17.1 What is Physics?
17.2 Sound Waves
17.3 The Speed of Sound
17.4 Traveling Sound Waves
17.5 Intensity and Sound Characteristics
17.6 Three-Dimensional Propagation of Waves
17.7 Standing Waves
17.8 Interference
17.9 Beats
17.10 The Doppler Effect
17.11 Supersonic Speeds, Shock Waves
Review and Summary
Problems
Practice Questions
Answer Key

18 Temperature, Zeroth Law of Thermodynamics and Thermal Expansion
18.1 What Is Physics?
18.2 Temperature
18.3 The Zeroth Law of Thermodynamics
18.4 Measuring Temperature
18.5 The Celsius and Fahrenheit Scales
18.6 Thermal Expansion
18.7 Expansion of Solids
18.8 Expansion of Liquids
18.9 Surface tension
18.10 Surface Energy (U)
18.11 Capillarity and Capillary Rise
Review and Summary
Problems
Practice Questions
Answer Key

19 Heat – Measurement and Transfer
19.1 What is Physics?
19.2 Temperature and Heat
19.3 The Absorption of Heat by Solids and Liquids
19.4 Calorimetry
19.5 Heat Transfer Mechanisms
19.6 Applications of Stefan’s Law
19.7 Wien’s Displacement Law
19.8 Newton’s Law of Cooling
Review and Summary
Problems
Practice Questions
Answer Key

20 The Kinetic Theory of Gases
20.1 What is Physics?
20.2 Avogadro’s Number
20.3 Ideal Gases
20.4 Pressure, Temperature, and RMS Speed
20.5 Translational Kinetic Energy
20.6 The Distribution of Molecular Speeds
20.7 The Equipartition of Energy and Degrees of Freedom
20.8 A Hint of Quantum Theory
Review and Summary
Problems
Practice Questions
Answer Key

21 The First Law of Thermodynamics
21.1 What is Physics?
21.2 A Closer Look at Heat and Work
21.3 The First Law of Thermodynamics
21.4 Some Special Cases of the First Law of Thermodynamics
21.5 Some Applications of First Law of Thermodynamics
21.6 The Adiabatic Expansion of an Ideal Gas
21.7 The Carnot Engine
Review and Summary
Problems
Practice Questions
Answer Key

Appendix A Mathematical Formulas
Appendix C JEE Main 2026 Questions
with Solutions
