

Electromagnetic Field Theory and Transmission Lines

By [Gottapu Sasibhushana Rao](#)

Paperback

9788126536153

₹1,199.00

Pages: 436

Description

- This is a comprehensive textbook designed to cover almost all the topics of electromagnetic field theory, transmission lines and waveguides.
- The theoretical basics are analyzed and physical interpretations are presented in an appropriate and lucid manner
- All the concepts are well explained with the help of illustrations, diagrams and appropriate examples that follow the topic. This helps the student to easily understand difficult topics
- Key equations and formulae have been highlighted
- In addition, each chapter includes summary, multiple-choice questions and review questions that greatly assist in revision of the chapter

About the Author

Gottapu Sasibhushana Rao

Prof. Gottapu Sasibhushana Rao is a Professor & head of the Department of Electronics & Communication Engineering

Table of Contents

- Review of Coordinate Systems and Vector Analysis
- Electrostatics
- Magnetostatics
- Maxwell's Equations
- Electromagnetic Wave Characteristics I
- Electromagnetic Wave Characteristics II
- Guided Waves
- Transmission Lines I
- Transmission Lines II
- Waveguides
- Glossary
- Index
