eBook - Innovative Engineering with AI Applications

By Anamika Ahirwar, Piyush Kumar Shukla, Manish Shrivastava, Priti Maheshwary, Bhupesh Gour

eBook 9789363862432 ₹- *Price*

Pages: 288

Description

Innovative Engineering with AI Applications explores how artificial intelligence can drive innovation across engineering domains and simplify business problems. It highlights the integration of AI with emerging technologies like data, system architecture, and blockchain to create novel, useful, and efficient technology-based business models and networks. Essential for AI developers, business leaders, researchers, and students.

About the Author

Anamika Ahirwar, Piyush Kumar Shukla, Manish Shrivastava, Priti Maheshwary, Bhupesh Gour

Anamika Ahirwar is an associate professor at the Compucom Institute of Information Technology & Management, Jaipur, India.

Table of Contents

1 Introduction of AI in Innovative Engineering

2 An Analytical Review of Deep Learning Algorithms for Stress Prediction in Teaching Professionals

3 Deep Learning: Tools and Models

4 Web Service Composition Using an AI Planning Technique

5 Artificial Intelligence in Agricultural Engineering

6 The Potential of Artificial Intelligence in the Healthcare System

7 Improvement of Computer Vision-Based Elephant Intrusion Detection System with Deep Learning Models

8 A Study of WSN Privacy Through AI Technique

9 Introduction to AI Technique and Analysis of Time Series Data Using Facebook Prophet Model

10 A Comparative Intelligent Environmental Analysis of Air-Pollution in COVID Using IoT and AI

11 Eye-Based Cursor Control and Eye Coding Using Hog Algorithm and Neural Network

12 Role of Artificial Intelligence in the Agricultural System

13 Improving Wireless Sensor Networks Effectiveness with Artificial Intelligence
