eBook - Artificial Intelligence and Quantum Computing for Advanced Wireless Networks

By Savo G. Glisic, Beatriz Lorenzo

eBook 9789373320540 ₹- *Price*

Pages: 864

Description

This book provides a comprehensive guide on implementing artificial intelligence and quantum computing in large-scale wireless networks. It covers machine learning fundamentals, neural networks, quantum communications, optimization theories, and AI-based algorithms for network deployment, control, and optimization, with practical case studies in Python and R. Ideal for engineers, researchers, and students in communication and computer science.

About the Author

Savo G. Glisic, Beatriz Lorenzo

Savo G. Glisic is Research Professor at Worcester Polytechnic Institute, Massachusetts, USA; Beatriz Lorenzo is Assistant Professor in the Department of Electrical and Computer Engineering at the University of Massachusetts Amherst, USA.

Table of Contents

Part I Artificial Intelligence, 1

1 Introduction

2 Machine Learning Algorithms

3 Artificial Neural Networks

4 Explainable Neural Networks

5 Graph Neural Networks

6 Learning Equilibria and Games

7 AI Algorithms in Networks

Part II Quantum Computing

8 Fundamentals of Quantum Communications

9 Quantum Channel Information Theory

10 Quantum Error Correction

11 Quantum Search Algorithms

12 Quantum Machine Learning

13 QC Optimization

14 Quantum Decision Theory

15 Quantum Computing in Wireless Networks

16 Quantum Network on Graph

17 Quantum Internet
