Pages: 272

Description

Security Issues and Privacy Concerns in Industry 4.0 Applications is a comprehensive book edited by international experts, covering security and privacy challenges in Industry 4.0. It discusses threats, research opportunities, and solutions in areas such as IoT, cloud computing, additive manufacturing, blockchain, AI, and machine learning, offering insights for researchers and industry specialists.

About the Author

Shibin David, R. S. Anand, V. Jeyakrishnan, M. Niranjanamurthy

Shibin David is an assistant professor in the Department of Computer Science and Engineering at Karunya Institute of Technology and Sciences, India.

Table of Contents

1 Industry 4.0: Smart Water Management System Using IoT

2 Fourth Industrial Revolution Application: Network Forensics Cloud Security Issues

3 Regional Language Recognition System for Industry 4.0

4 Approximation Algorithm and Linear Congruence: An Approach for Optimizing the Security of IoT-Based Healthcare Management System

5 A Hybrid Method for Fake Profile Detection in Social Network Using Artificial Intelligence

6 Packet Drop Detection in Agricultural-Based Internet of Things Platform

7 Smart Drone with Open CV to Clean the Railway Track

8 Blockchain and Big Data: Supportive Aid for Daily Life

9 A Novel Framework to Detect Effective Prediction Using Machine Learning

10 Dog Breed Classification Using CNN

11 Methodology for Load Balancing in Multi-Agent System Using SPE Approach

12 The Impact of Cyber Culture on New Media Consumers
