WILEY

eBook - Computational Models for Cognitive Vision

By Hiranmay Ghosh

eBook 9789373325286 ₹- Price

Pages: 240

Description

Computational Models for Cognitive Vision by Hiranmay Ghosh explores cognitive principles in biological vision and applies them to computer vision tasks such as perceptual grouping, attention, and knowledge-based interpretation. It integrates Bayesian reasoning, deep learning, and cognitive architectures to develop versatile machine vision systems akin to human vision. Applications include computational photography and social robots.

About the Author

Hiranmay Ghosh

Hiranmay Ghosh was a Research Advisor to TATA Consultancy Services and an Adjunct Faculty Member with the National Institute of Technology Karnataka.

Table of Contents

1 Introduction

2 Early Vision

3 Bayesian Reasoning for Perception and Cognition

4 Late Vision

5 Visual Attention

6 Cognitive Architectures

7 Knowledge Representation for Cognitive Vision

8 Deep Learning for Visual Cognition

9 Applications of Visual Cognition

10 Conclusion
