eBook - Risk Modeling: Practical Applications of Artificial Intelligence, Machine Learning, and Deep Learning

By Terisa Roberts, Stephen J. Tonna

eBook 9789373324876 ₹- *Price*

Pages: 208

Description

Risk Modeling: Practical Applications of Artificial Intelligence, Machine Learning, and Deep Learning provides an in-depth guide on using AI and machine learning for financial risk management. It covers practical implementation, bias assessment, model governance, and applications to extreme events like pandemics and climate change, helping professionals optimize risk models effectively.

About the Author

Terisa Roberts, Stephen J. Tonna

Terisa Roberts is Global Solution Lead for Risk Modeling and Decisioning at SAS; Stephen J. Tonna is Senior Banking Solutions Advisor at SAS.

Table of Contents

1. Introduction
2. Data Management and Preparation
3. Artificial Intelligence, Machine Learning, and Deep Learning Models for Risk Management
4. Explaining Artificial Intelligence, Machine Learning, and Deep Learning Models
5. Bias, Fairness, and Vulnerability in Decision-Making
6. Machine Learning Model Deployment, Implementation, and Making Decisions
7. Extending the Governance Framework for Machine Learning Validation and Ongoing Monitoring
8. Optimizing Parameters for Machine Learning Models and Decisions in Production
9. The Interconnection between Climate and Financial Instability
