WILEY

eBook - Computational Leadership: Connecting Behavioral Science and Technology to Optimize Decision-Making and Increase Profits

By Brian R. Spisak

eBook 9789373325576 ₹- *Price*

Pages: 224

Description

Computational Leadership by Brian R. Spisak explores using computational technologies like AI, simulations, and network analysis to improve leadership effectiveness. It provides strategies for enhancing remote work relationships, promoting diversity and inclusion, and strengthening supply chains through blockchain and digital twins. The book bridges behavioral science and technology to optimize decision-making and increase business profits.
