eBook - Unsupervised: Navigating and Influencing a World Controlled by Powerful New Technologies

By Daniel Doll-Steinberg, Stuart Leaf

eBook 9789377066451 ₹- *Price*

Pages: 400

Description

An exploration of how emerging technologies such as AI, automation, and algorithms shape society and decision-making. The book discusses power, control, and influence in a tech-driven world. It encourages readers to critically engage with technology rather than passively accept its outcomes.

About the Author

Daniel Doll-Steinberg, Stuart Leaf

DANIEL DOLL-STEINBERG, after a career in the early days of global derivatives technology industry, he created one of the first global standards for digital rights management, securing and delivering activation keys and content direct to customers, which helped transform the software industry.

STUART LEAF started his career at Merrill Lynch Capital Markets and Goldman Sachs. He held senior positions in smaller real estate, private equity, and asset management firms, before co-founding Cadogan Management, a Fund of Hedge Funds, in 1994.

Table of Contents

Part I Important Technologies You Cannot Ignore

Part II The Impact and Implications on Humanity of Disruptive Technologies

Part III Final Thoughts
