eBook - Managerial Accounting: Principles, Analytics, and Artificial Intelligence

By Joseph Ugrin, Amy Igou

eBook 9789377064372 ₹- Price

Pages: 512

Description

Managerial Accounting: Principles, Analytics, and Artificial Intelligence is a textbook that covers foundational managerial accounting topics and explores the integration of artificial intelligence, automation, and analytics in the field. It emphasizes using real-world examples to enhance decision-making and internal financial communication, aimed at undergraduates in business and accounting programs.
