eBook - Artificial Intelligence (AI) in Forensic Sciences

By Zeno Geradts, Katrin Franke

eBook 9789373329369 ₹- *Price*

Pages: 256

Description

Artificial Intelligence (AI) in Forensic Sciences offers a comprehensive overview of AI applications in forensic science, addressing validation, bias, legal challenges, and new AI-driven crimes. It covers AI in digital evidence, facial comparison, deepfake detection, genetic markers, legislative issues, and courtroom argumentation, making it essential for forensic students and professionals.

About the Author

Zeno Geradts, Katrin Franke

Zeno Geradts is a senior forensic scientist at the Forensic Digital Biometrics Traces Department at the Netherlands Forensic Institute, Ministry of Justice and Security, The Hague, The Netherlands; Katrin Franke is Professor of Computer Science at the Department of Information Security and Communication Technology at NTNU in Gjøvik, Norway.

Table of Contents

1. Introduction to AI in Forensic Sciences
2. Validation and Challenges of AI in Forensics
3. AI Applications in Forensic Science (Cyber IoT, Speaker and Facial Recognition, Deepfake Detection)
4. Digital Evidence and Forensic Audio/Video Analysis
5. Text and Multimedia Analytics in Forensics
6. Legal and Ethical Issues of AI in Forensics
7. Case Applications and AI in Court Argumentation
8. Genetic Markers and AI Legislation
9. Forensic Fingerprint Analysis
10. Future Trends and Research in AI for Forensic Science
