eBook - Sustainable Approaches in Pharmaceutical Sciences

By Kamal Shah, Durgesh Nandini Chauhan, Nagendra Singh Chauhan

eBook 9789373326986 ₹- *Price*

Pages: 288

Description

Sustainable Approaches in Pharmaceutical Sciences is a comprehensive text exploring green and sustainable methods in pharmaceutical development, design, and synthesis. It covers green technologies, AI in drug discovery, eco-friendly pharmaceutical ingredients, impact on industry solvents and formulations, micro-extraction techniques, and commercial scale sustainable chemistry for human and environmental health.

About the Author

Kamal Shah, Durgesh Nandini Chauhan, Nagendra Singh Chauhan

Kamal Shah, Professor of Pharmaceutical Chemistry, Institute of Pharmaceutical Research, GLA University, Mathura, India; Durgesh Nandini Chauhan, Assistant Professor, Columbia College of Pharmacy, Raipur, India; Nagendra Singh Chauhan, Senior Scientific Officer, Drugs Testing Laboratory Avam Anusandhan Kendra, Government Ayurvedic College Campus, Raipur, India.

Table of Contents

1. Green and Sustainable Approaches in Pharmaceutical Sciences
2. Green Approaches in Conventional Drug Synthesis
3. Modern Green Extraction Techniques
4. Impact of Green Approaches in Pharmaceutical Industries
5. Green Analytical Techniques Using Hydrotropy, Mixed Hydrotropy, and Mixed Solvency
6. Application of Artificial Intelligence in Drug Design and Development
7. Green Chemistry in the Development of Functionalised Hydrogels as Topical Drug-Delivery Systems
8. Advanced Approaches in Green Univariate Spectrophotometric Methods
9. Cyclodextrin-Based Molecular Inclusion by Grinding: Quality by Design in Green Chemistry
10. Synthesis of Graphitic Carbon Nitride Quantum Dots from Bulk Graphitic Carbon Nitride
11. Mechanochemistry for Sustainable Drug Design and Active Pharmaceutical Ingredient Synthesis
