eBook - Industrial Strategies and Solutions for 3D Printing: Applications and Optimization

By Hamid Reza Vanaei, Sofiane Khelladi, Abbas Tcharkhtchi

eBook 9789377065584 ₹- *Price*

Pages: 320

Description

Industrial Strategies and Solutions for 3D Printing: Applications and Optimization provides a comprehensive overview of 3D printing, covering materials, process control, optimization, and machine learning. It addresses multidisciplinary applications across industries, challenges in process monitoring, and techniques to transition 3D printing from lab to industrial scale, with insights into emerging AI integration.

About the Author

Hamid Reza Vanaei, Sofiane Khelladi, Abbas Tcharkhtchi

Hamid Reza Vanaei is an Associate Professor at Ecole Supérieure d'Ingénieurs Léonard de Vinci (ESILV), Léonard de Vinci University in Paris, France; Sofiane Khelladi is a Full Professor at Arts et Métiers Institute of Technology in Paris, France; Abbas Tcharkhtchi is a Full Professor at Arts et Métiers Institute of Technology in Paris, France.

Table of Contents

1 3D Printing as a Multidisciplinary Field

2 Potential of 3D Printing from Lab to Industry

3 Applicable Materials and Techniques in 3D Printing

4 Diverse Application of 3D Printing Process

5 Emerging Challenges in the Evaluation of 3D-printed Parts

6 Importance of Multi-objective Evaluation in 3D Printing

7 Role of Controlling Factors in 3D Printing

8 Physico-chemical Features of 3D-printed Parts

9 3D Printing Optimization: Importance of Rheological Evaluation

10 Investigating Mechanical Performance of 3D-printed Parts

11 Thermal Modeling of Material Extrusion Additive Manufacturing

12 In-Process Temperature Monitoring in 3D Printing

13 Optimizing Controlling Factors and Characteristics of 3D-printed Parts

14 Machine Learning in 3D Printing
