

Computer System Architecture and Organization, As per AICTE

By Dr. M. Usha, T.S. Srikanth

Paperback

9788126509836

₹850.00

Pages: 296

Description

Computer System Architecture and Organization has a good mix of hardware- and software-oriented topics. A comprehensive and up-to-date view of the architecture and internal organization of computers has been presented in the book. The processor design has been dealt with in an in-depth manner. Assuming the readers are familiar with assembly language and digital logic design, the CPU design is explained. For readers who do not have the prerequisite knowledge in Digital Logic design, an Appendix is supplemented at the end.

About the Author

Dr. M. Usha, T.S. Srikanth

Dr. M. Usha is a professor of Computer Science and Engineering at Sona College of Technology, Salem, India. Prior to joining the current position, she was with the faculty of Coimbatore Institute of Technology (CIT), Coimbatore and College of Engineering, Guindy, Anna University. She has 22 years of teaching experience. Since 1993, she has been teaching Computer Architecture for undergraduate and postgraduate students of engineering. Dr. Usha is a member of IEEE, life member of Institution of Engineers (India), Computer Society of India (CSI)

Table of Contents

Chapter 1 Introduction and Trends on Computer Architecture

- 1.1 Introduction
- 1.2 Evolution of Computers
- 1.3 Computer Generations
- 1.4 Functional Elements of a Computer
- 1.5 Technology Advancements in Computer Architecture
- 1.6 Computer Classifications

Chapter 2 Operational Units of a Computer

- 2.1 Introduction
- 2.2 Evolution of Bus in Computers
- 2.3 Internal Bus Architecture
- 2.4 External Bus Structure

Chapter 3 Data Representations and Arithmetic Algorithms

- 3.1 Introduction
- 3.2 Number Representations

3.3 Integer Data Computations

3.4 Multiplication

3.5 Division of Integers

3.6 Floating-Point Data Computations

Chapter 4 Central Processing Unit

4.1 Introduction

4.2 Organization of Central Processing Unit

4.3 ISA Categories

4.4 Basic Concepts of Instructions

4.5 Types of Instructions

4.6 ISA Design

4.7 Addressing Modes

4.8 Control Unit Design

Chapter 5 Memory Organization

5.1 Introduction

5.2 Semiconductor Memory Cell

5.3 Read-Only Memory

5.4 Memory Hierarchies

5.5 Cache Memory

5.6 Virtual Memory

5.7 Secondary Memories

Chapter 6 I/O Organization

6.1 Introduction

6.2 Interfacing I/O Devices

6.3 Program-Controlled I/O

6.4 Interrupts

6.5 Direct Memory Access

6.6 I/O Processors

6.7 I/O Buses

6.8 Bus Standards

Chapter 7 Instruction-Level Parallelism

7.1 Introduction

7.2 Pipeline Hazards

7.3 Designing Instruction Sets for Pipelining

7.4 Superscalar Machines

7.5 Pipeline Performance

Chapter 8 Multiprocessor Systems

8.1 Introduction

8.2 Parallel Processing

8.3 Array Processors

8.4 Structure of a Multiprocessor System

8.5 Interconnection Structures

8.6 Cache Coherence

Chapter 9 Performance Measures for Computer Architecture

9.1 Performance Attributes

9.2 Memory Attributes

9.3 Device Throughput

9.4 Discussions on Selection Schema

Chapter 10 Case Studies

10.1 General-Purpose Processors

10.2 Embedded Applications

Summary

Key Terms

Multiple-Choice Questions

Review Questions

Further Readings

Answers

Appendix: Digital Logic Circuits

A.1 Introduction

A.2 Basic Logic Gates

A.3 Boolean Laws

A.4 NAND Gate Equivalents

A.5 Flip-Flops

A.6 Registers

A.7 Counter

A.8 Multiplexer

A.9 Demultiplexer

A.10 Decoder

A.11 Encoder

A.12 Finite State Machine
