₹1,149.00

Pages: 556

Description

Information technology (IT) defines the manner in which organisations and businesses operate and compete. The role of the modern manager is to both manage IT and to harness its immense potential for innovation and growth. The purpose of this book is to understand the decisions managers have to make with regard to IT and innovating with IT. This book explains key technologies that constitute the modern IT landscape and also explores the manner in which IT shapes the world around us. The discussions, examples and cases are drawn largely from the Indian context, though their relevance and scope is universal.

About the Author

RAHUL DE

Dr. Rahul De is the Hewlett-Packard Chair Professor of Information Systems at the Indian Institute of Management Bangalore (IIMB). He has a B.Tech. from IIT Delhi, and an MBA from the Faculty of Management Studies, University of Delhi. He went on to join the doctoral program of the Katz Graduate School of Business, of the University of Pittsburgh

About the Author

List of Figures

List of Tables

Part I MIS And Organisations

Chapter 1 Organisations and Information Systems

1.1 Modern Organisation

1.2 Information Systems in Organisations

1.3 Brief History of Computing

1.4 The Role of the Internet

1.5 Managing in the Internet Era

1.6 Managing Information Systems in Organisations

1.7 Challenges for the Manager

Chapter 2 IT and Innovation

2.1 Innovation Theory

2.2 Innovation Impact

2.3 Types of Business Innovations with IT

2.4 Management Issues: Challenges for Managers

Chapter 3 Concepts of Management Information Systems

3.1 Data and Information

3.2 Information as a Resource

3.3 Information in Organisational Functions

3.4 Types of Information Technology

3.5 Types of Information Systems

3.6 Decision Making with MIS

3.7 Communication in Organisations

Chapter 4 IT Strategy and Digital Goods

4.1 The Competitive Environment of Business

4.2 Using IT for Competing

4.3 Information Goods

4.4 Information Systems and Competitive Strategy

Chapter 5 Electronic Commerce, Electronic Business, Electronic Governance

5.1 E-Commerce Technology

5.2 HTML and Email

5.3 Doing Business over the Internet

5.4 E-Business

5.5 E-Governance

Chapter 6 Managing Information Systems

6.1 Challenges of Managing the IT Function

6.2 Vendor Management

6.3 The Role of the CIO

6.4 IT Governance

Chapter 7 Ethical and Social Issues

7.1 Ethical Issues

7.2 Social Issues

7.3 Dark Side of IT

Chapter 8 Managing Green IT and Smart Cities

8.1 Introduction: The Green Imperative

8.2 Greenhouse Gases and Global Warming

8.3 Carbon Footprint

8.4 What is Green IT?

8.5 Green Practices in Hardware Design and Manufacture

8.6 Green Practices in Software Design

8.7 Green Practices in IT Use

8.8 IT for Green Practices

8.9 Monitoring Value Chain Activities

8.10 Smart Cities

8.11 Management Issues: Challenges for Managers

Part II Fundamentals Of IT

Chapter 9 Information Technology Infrastructure and Choices

9.1 What is the IT Infrastructure?

9.2 IT Infrastructure Decisions

9.3 Infrastructure Components

9.4 Networks

9.5 Solutions

Chapter 10 Cloud Computing and Internet-of-Things

10.1 Cloud Computing

10.2 Internet-of-Things

10.3 Challenges of Cloud Computing and IoT

Chapter 11 Networking and Telecommunication

11.1 Life of a Packet

11.2 Structure of the Network

11.3 Network Services and Layers

Chapter 12 Information Systems Security and Control

12.1 Threats to the Organisation

12.2 Technologies for Handling Security

12.3 Managing Security

Chapter 13 Information Systems Development and Project Management

13.1 Analysis of Business Processes

13.2 Life Cycle Models

13.3 Software Project Management

Chapter 14 Managing Data Resources

14.1 The Need for Data Management

14.2 Challenge of Data Management

14.3 Database Concepts

14.4 Database Design

14.5 Data Warehouses

14.6 Big Data

Chapter 15 Business Process Integration and Enterprise Systems

- 15.1 Business Process Integration
- 15.2 Motivation for Enterprise Systems
- 15.3 Enterprise Resource Planning Systems
- 15.4 Supply Chain Management Systems
- 15.5 Customer Relationship Management Systems
- 15.6 Challenges of Enterprise Systems Implementations
- 15.7 International Information Systems

Chapter 16 Decision Support Systems

- 16.1 Decision Support Systems
- 16.2 Components of a DSS
- 16.3 Analytics and Business Intelligence
- 16.4 Knowledge Management

Chapter 17 Artificial Intelligence

- 17.1 Introduction and History of AI
- 17.2 The Turing Test
- 17.3 Representation and Search
- 17.4 Machine Learning
- 17.5 Implications for Managers

Part III Social Aspects Of IS

Chapter 18 ICT for Development and E-Governance

- 18.1 ICT for Development
- 18.2 Types of ICT Interventions
- 18.3 Examples of ICT for Development Projects
- 18.4 E-Governance Concepts
- 18.5 E-Government
- 18.6 E-Participation

Chapter 19 The Society of the Internet

- 19.1 Social Dynamics of the Internet
- 19.2 Services of the Internet
- 19.3 Technology of the Internet
- 19.4 Social Issues
- 19.5 Social Networks in the Enterprise

Chapter 20 Open Source Software

- 20.1 The Concept of Open Source Software
- 20.2 Open Source Licences
- 20.3 Open Source in Business and Government
- 20.4 Open Data Standards and the Open Community
