

Satellite Communications, As per AICTE

By Anil K. Maini, Varsha Agrawal

Paperback

9788126520732

₹999.00

Pages: 504

Description

The text is an up-to-date and comprehensive title in the field of satellite communication technology and applications. It offers full coverage of the theoretical and practical concepts of the communication satellites and also briefly talks about the other applications including remote sensing, weather forecasting, navigation, scientific and military. The essentials of satellite technology are explained by giving an introduction to the fundamental topics such as orbits and trajectories, launch and in-orbit operations before going on to describe satellite hardware.

About the Author

Anil K. Maini, Varsha Agrawal

Anil K. Maini is Director at Laser Science and Technology Centre, an R&D establishment under Defence Research and Development Organization (DRDO), India. He has worked on a wide range of electronics, optoelectronics and laser systems. His areas of expertise include Optoelectronic sensor systems, Laser systems, Power electronics

Table of Contents

Preface

1. Introduction to Satellites and Their Applications

1.1 What is a Satellite?

1.2 History of Evolution of Satellites

1.3 Evolution of Launch Vehicles

1.4 Future Trends

2 Satellite Orbits and Trajectories

2.1 Definition of an Orbit and a Trajectory

2.2 Orbiting Satellites: Basic Principles

2.3 Orbital Parameters

2.4 Injection Velocity and Resulting Satellite Trajectories

2.5 Types of Satellite Orbits

3 Satellite Launch and In-Orbit Operations

3.1 Acquiring the Desired Orbit

3.2 Satellite Launch Sequence

3.3 Orbital Perturbations

3.4 Satellite Stabilization

3.5 Orbital Effects on Satellite's Performance

3.6 Eclipses

3.7 Look Angles of a Satellite

3.8 Earth Coverage and Ground Tracks

4 Satellite Hardware

4.1 Satellite Subsystems

4.2 Mechanical Structure

4.3 Propulsion Subsystem

4.4 Thermal Control Subsystem

4.5 Power Supply Subsystem

4.6 Attitude and Orbit Control

4.7 Tracking, Telemetry and Command Subsystem

4.8 Payload

4.9 Antenna Subsystem

4.10 Space Qualification and Equipment Reliability

5 Communication Techniques

5.1 Types of Information Signals

5.2 Amplitude Modulation

5.3 Frequency Modulation

5.4 Pulse Communication Systems

5.5 Sampling Theorem

5.6 Shannon-Hartley Theorem

5.7 Digital Modulation Techniques

5.8 Multiplexing Techniques

6 Multiple Access Techniques

6.1 Introduction to Multiple Access Techniques

6.2 Frequency Division Multiple Access (FDMA)

6.3 SCPC Systems

6.4 MCPC Systems

6.5 Time Division Multiple Access (TDMA)

6.6 TDMA Frame Structure

6.7 TDMA Burst Structure

6.8 Computing Unique Word Detection Probability

6.9 TDMA Frame Efficiency

6.10 Control and Coordination of Traffic

6.11 Frame Acquisition and Synchronization

6.12 FDMA vs. TDMA

6.13 Code Division Multiple Access (CDMA)

6.14 Space Domain Multiple Access (SDMA)

7 Satellite Link Design Fundamentals

7.1 Transmission Equation

7.2 Satellite Link Parameters

7.3 Frequency Considerations

7.4 Propagation Considerations

7.5 Noise Considerations

7.6 Interference-Related Problems

7.7 Antenna Gain-To-Noise Temperature (G/T) Ratio

7.8 Link Design

8 Earth Station

8.1 Earth Station

8.2 Types of Earth Station

8.3 Earth Station Architecture

8.4 Earth Station Design Considerations

8.5 Earth Station Testing

8.6 Earth Station Hardware

8.7 Satellite Tracking

8.8 Some Representative Earth Stations

9 Communication Satellites

9.1 Introduction to Communication Satellites

9.2 Communication-Related Applications of Satellites

9.3 Frequency Bands

9.4 Payloads

9.5 Satellite vs. Terrestrial Networks

9.6 Satellite Telephony

9.7 Satellite Television

9.8 Satellite Radio

9.9 Satellite Data Communication Services

9.10 Important Missions

10 Other Applications

10.1 Remote Sensing Satellites

10.2 Weather Forecasting Satellites

10.3 Navigation Satellites

10.4 Scientific Satellites

10.5 Military Satellites

Key Terms

Multiple-Choice Questions
