Description

Is no one reading your reports? Are your analytical findings not getting the attention they deserve? Do your reports lack a human touch? It's time you tried the 'data comic stories' approach. 'From Data to Stories' shows how comics and data visualisation combine well to help narrate insights as engaging stories. The data comic examples, and the tutorial in this book will inspire you to create enjoyable data comic reports that everyone would want to read. No more boring reports. Say 'hello' to storytelling with data comics.
