

Basic Electrical and Electronics Engineering, 2ed

By Dr. Vinoth Kumar K, Dr. Saravanakumar R, Dr. Jegathesan V, Dr. Kowsalya M, Dr. Mahesh M

Paperback

9789354643194

₹839.00

Description

This book, Basic Electrical and Electronics Engineering, is meant for a wide range of readers who wish to learn the basic concepts. This book addresses the basic requirements of the course in B.E., B.Tech, B.Sc. Electrical and Electronics Engineering, Electronics and Communication Engineering, Electronics and Instrumentation Engineering, Mechanical Engineering, Information Science Engineering, Computer Science Engineering, Biomedical Engineering, Robotics Engineering, Aerospace Engineering, Marine Engineering, etc. The entire book is written in a style to enable the students to understand the subject matter without much difficulty.

About the Author

Dr. Vinoth Kumar K, Dr. Saravanakumar R, Dr. Jegathesan V, Dr. Kowsalya M, Dr. Mahesh M

Dr. Vinoth Kumar K is working as an Associate Professor in the Department of Electrical and Electronics Engineering at New Horizon College of

Engineering, Bengaluru. He is having 12.8 years of teaching as well as research experience and his research area includes Condition monitoring of electrical machines, Signal and Model-Based Techniques, Soft computing techniques in Power electronics applications, Neuro-Fuzzy Computing, Computational based classification for breast cancer, Photonic Crystal Fiber

Table of Contents

Preface

About the Authors

Chapter 1 Basics of Electrical Engineering

1.1 Electrical Quantities

1.2 Definitions About Various Quantities

1.3 SI Units

Chapter 2 DC Circuits

2.1 Introduction

2.2 Circuit Laws

2.3 Series and Parallel Circuits

2.4 Nodal and Mesh Analysis

2.5 Delta to Wye Transformation

2.6 Wye to Delta Transformation

Chapter 3 Network Theorems

3.1 Superposition Theorem

3.2 Thevenin's Theorem

3.3 Norton's Theorem

3.4 Maximum Power Transfer Theorem

3.5 Millman's Theorem

3.6 Reciprocity Theorem

3.7 Substitution Theorem

3.8 Compensation Theorem

3.9 Tellegen's Theorem

Chapter 4 DC Transients

4.1 Basics of Response

4.2 Time-Domain Analysis of R-L Circuit

4.3 Time-Domain Analysis of R-C Circuit

4.4 Time-Domain Analysis of R-L-C Circuit

Chapter 5 Magnetic Circuits

5.1 Definitions of Magnetic Quantities

5.2 Analysis of Magnetic Circuit

5.3 Magnetic Leakage

5.4 Retentivity

5.5 Magnetic Hysteresis

5.6 Magnetization Cycle

5.7 Hysteresis Loss

5.8 Steinmetz Law

5.9 Eddy Current Loss

Chapter 6 Principles of Electrical Machines

6.1 Functions of Electrical Machines

6.2 Permanent Magnet

6.3 Electromagnet

6.4 Laws of Electromagnetic Induction

6.5 Electrochemical Energy Conversion

Chapter 7 AC Circuits

7.1 Introduction

7.2 Generation of Alternating E.M.F.

7.3 Equation of Alternating Voltage

7.4 Alternating Quantity (Current or Voltage)

7.5 Cycle

7.6 Time Period (T)

7.7 Frequency (F)

7.8 Angular Frequency

7.9 Maximum or Peak Value or Amplitude

7.10 Average Value

7.11 Root Mean Square Value

7.12 Form Factor

7.13 Peak Factor

7.14 Expression for RMS Value, Average Value of Sinusoidal Alternating Quantity

7.15 Expression for RMS, Average Value of Half-Wave Rectified AC

7.16 Phase Representation of Alternating Quantity

7.17 Resonance

7.18 Series Resonance

7.19 Parallel Resonance

Chapter 8 Polyphase Systems

8.1 Two-Phase System

8.2 Three-Phase System

8.3 Three-Phase System of Connections

8.4 Phase Sequence

8.5 Balanced or Unbalanced Three-Phase System

8.6 Symmetrical or Unsymmetrical Systems

8.7 Voltages and Currents

8.8 Systems of Connections

8.9 Star- or Wye-Connected System

8.10 Delta Connected Systems

8.11 Comparison Between Star and Delta

8.12 Line Voltage Vector Diagrams with Load Current-Star/Delta

8.13 Balanced Star Load with Impedance

8.14 Balanced Delta Load with Impedance

8.15 Power Measurement in Single-Phase System

8.16 Power Measurement in Three-Phase System

8.17 Two-Wattmeter Method of Power Measurement

8.18 Two-Wattmeter Method Measurement

8.19 Unbalanced Loads in Star

8.20 Symmetrical Components

Chapter 9 Electrical Machines

9.1 Introduction

9.2 DC Machines

9.3 Transformer

9.4 Three-Phase Induction Motor

9.5 Single-Phase Induction Motor

9.6 Synchronous Motor

9.7 Autotransformer

9.8 Universal Motor

9.9 Linear Induction Motor

9.10 Stepper Motor

9.11 Servomotor

9.12 BLDC Motor

Chapter 10 Basics of Measuring Instruments

10.1 Introduction

10.2 Classification

10.3 Principle of Analog Instrument

10.4 Moving Coil Instruments

10.5 Moving Iron Instrument

10.6 Use of Voltmeters and Ammeters

10.7 Dynamometer Type Wattmeter

10.8 Induction Type Energy Meter

10.9 Megger

10.10 Measurement Errors

Chapter 11 Basics of Domestic Wiring and Batteries

11.1 Introduction

11.2 Factors Affecting Choice of Wiring System

11.3 Wiring Materials and Accessories

11.4 Types of Wiring

11.5 Rules for Wiring

11.6 Specification of Wires

11.7 Two-way and Three-way Control of Lamps

11.8 Fluorescent Tube Wiring

11.9 Simple Domestic Layout

11.10 Earthing

Chapter 12 Basics of Power Systems

12.1 Introduction

12.2 Types of Power Stations

12.3 Transmission

12.4 Distribution

Chapter 13 Basics of Electrical Components

13.1 Resistors

13.2 Fixed Resistors

13.3 Variable Resistors

13.4 Color Coding

13.5 Capacitors

13.6 Dissipation Factor

13.7 Inductors

13.8 Chokes

Chapter 14 Basics of Semiconductor Devices and Power Electronics

14.1 Classification of Materials

14.2 Properties of Semiconductors

14.3 Classification of Semiconductors

14.4 P-N Junction

14.5 P-N Junction Diode

14.6 Rectifiers

14.7 Zener Diode

14.8 Filters

14.9 Bipolar Transistor

14.10 Field Effect Transistor

14.11 Basic Concepts of Power Electronics Converters

14.12 DC-DC Converters

14.13 Voltage Source Inverter

14.14 Pulse Width Modulation

Chapter 15 Basics of Special Semiconductor Devices

15.1 Silicon Controlled Rectifiers (SCRs)

15.2 Triode for Alternating Current (TRIAC)

15.3 Unijunction Transistor (UJT)

15.4 Opto-Electronic Devices

Chapter 16 Transducers

16.1 Basic Requirements of Transducers

16.2 Classification of Transducers

16.3 Displacement Transducers

16.4 Temperature Transducers

16.5 Piezoelectric Transducers

16.6 Hall Effect Transducer

16.7 Sensor and Actuator

Chapter 17 Basics of Linear and Digital Integrated Circuits

17.1 Integrated Circuits

17.2 Linear Integrated Circuits

17.3 IC Timer

17.4 Digital Integrated Circuits

17.5 Decimal and Binary Numbers

17.6 Octal and Hexadecimal Numbers

Chapter 18 Basics of Computers

18.1 Input Devices

18.2 Central Processing Unit (CPU)

18.3 Output Devices

18.4 Memory Devices

18.5 Memory Terminology

18.6 Mass Storage Data System

18.7 Computer Input Units

18.9 Plotters

18.10 Computer Output on Microfilm

18.11 Digital to Analog Converter

18.12 Classification of Computers

18.13 Microprocessors

Chapter 19 Basics of Communication

19.1 Analog and Digital Signal

19.2 Data Transmission

19.3 Modulation

19.4 Demodulation

19.5 Pulse Modulation

19.6 Digital Data Transmission

19.7 Data Communication System

19.8 MODEMS

19.9 Communication System

19.10 Computer Network

19.11 Integrated Services Digital Network (ISDN)

19.12 Internet
